DUPONT™ KEVLAR® IC 600D: ADVANCED ANTI-TRAUMA PROTECTION

Low trauma soft ballistic vest solution from DuPont™ Kevlar® IC 600D

The ability to react and respond to a threat can be the difference between life and death in combat situations. DuPont™ Kevlar® IC 600D is a soft ballistic vest component that gives the wearer a high chance of survival if hit by a bullet or small fragment, but is comfortable and flexible enough for everyday wear. It meets the needs of more and more military and swat teams requiring body armour with very low back face deformation.

DUPONT™ KEVLAR® IC 600D: ADVANCED ANTI-TRAUMA PROTECTION

WHY CHOOSE DUPONT™ KEVLAR® IC 600D?

- Reduces back face deformation
- Good ballistic performance
- Soft, flexible vest material
- Enables wearer to respond to threats, resulting in less injuries in the field
- Can be used for small, sensitive areas such as neck and pelvic protection
- Excellent in combination with Kevlar® XP products
- Low sensitivity to temperature
- Price competitive
- Available in rolls of 125cm width
- Does not burn
- Very low trauma soft ballistic solution

THE DUPONT SCIENCE BEHIND DUPONT™ KEVLAR® IC 600D

Developed by DuPont, a science company creating sustainable solutions, DuPont™ Kevlar® IC 600D is a multi-layer material including Kevlar® ballistic fabrics. The material functions by absorbing impact and energy.

TRIED AND TRUSTED SOLUTION

DuPont™ Kevlar® IC 600D is one of a wide range of life protection products based on DuPont™ Kevlar® aramid fibre. First developed by scientists from DuPont in 1965 using groundbreaking liquid crystalline polymer research, DuPont™ Kevlar® brand fibre is five times stronger than steel, yet lightweight and flexible. Continuously improved through innovation over four decades, it is trusted for military and police applications such as body armour, protective vests, helmets and vehicle armour, and has helped save thousands of people from death or serious injury.

In flammability tests, Kevlar® IC 600D has passed all test criteria, showing no flame, hole, debris or after-flame, and no afterglow.
